The CMX705 is an omni-directional clip-on ear microphone designed for vocal and speech applications.

Users will find their voices reproduced in a natural, true to life way, thanks to the flat frequency response characteristic which guarantees high-fidelity sound reproduction.

Because of the EMI and low noise suppression, low frequencies are repressed, shutting out hum and interference caused by other sources, which improves the sound reproduction quality, making it suited for vocal applications.

The high Sound Pressure level sees to it that even hard, vigorous sound won't distort the sound reproduction, while the omnidirectional polar pattern reduces feedback to a strict minimum.

The tiny design doesn't decrease its performance, but enhances the user's comfort and makes wearing it almost unnoticeable, both to speaker and audience.

It is available in Black and Skin Color and comes with 4 different replaceable connectors making it suitable for use with beltpacks of various major manufacturers.
